And can be delivered by the Proprietor's own boats to any part of the Kingdom.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire and through local depôts only, and has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus presented to consumers in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door floating, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of rapidly resisting frost. When used as a stucco it does not vegetate or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement in the usual ratio, but one measure of sand. This superior resisting power, combined with its eminently hydraulic properties, point it out as the fittest material for building sea and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.
Manufactories—J. B. WHITE and SONS, Millbank-street, Westminster, and 36, Seed-street, Limehouse.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Inventor of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to the Specification, page 481, and also Nos. 361 and 362, pages 341 and 351 of "The Builder," for accounts of EXPERIMENTS on the Strength of Portland Cements, wherein the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames—Tunnel Brick-work, and by the action of water it is strengthened in its cementitious qualities, harder, and more durable than any other description of Cement; it does not evaporate or decade, or turn green, nor is it affected by any atmospherical influence whatever the climate, resisting the contraction of the established Cements. I am, therefore, of opinion, that the use of this new material is a most valuable feature in building operations and fully justifies that which I was given to understand, viz., that it was an extra fifteen's material. I think it right to mention that I am at the present time having a trial extent of similar work executed at another range of buildings where time and the quality of the work are of the utmost importance.
Signed JNO. WALLEN, Architect, London.
To Messrs. Chas. Francis and Sons, Manufacturers, Nine Elms.

MARTIN'S PATENT
FIRE PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public so many years, and obtained such a high standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON, however feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will carry, as compared with other Cements for internal work, there will be found a gain of 16½ per cent. in materials, full 7 per cent. less in price, with an additional saving in labour of 10 per cent., by its allowing almost forty minutes for working, being less than one-fourth of the time of other cements of a similar nature, therefore worked with greater facility, making together the enormous sum of full THIRTY THREE PER CENT. This advantage therefore cannot admit of doubt. Specimens, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, Ivy-lane, Lambeth—Manufactory, Ferrard Mill, Derby.
N.B. This Cement will receive paint or paper in a few hours after the completion of the work by the plasterers.

JOHNS and Co.'s PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT.—The attention of the trade and the public generally is solicited to these very excellent and well known materials, which, for their beauty, durability, imperviousness and cheapness are unequalled. THE PERMANENT WASH, as a substitute for permanent fine wash or water-painting, is an article that has long been wanting for stucco and brick-work: it is of a more colour, but may be tinted to any other; is perfectly dry in twenty-four hours, will bear wash off, is very little dearer than the common washes, and, being a body substance, is admirably adapted for painted stucco, union workhouses, schools, barrack prisons, &c. One cwt. is sufficient to cover, with two coats, 25 square yards. THE CEMENT, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of its kind: it has no coarse qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water. The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouses, 32, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

FUNERAL FEATHERS.—TO UNDERTAKERS, UPHOLSTERERS, CABINET-MAKERS, and BUILDERS.—S. SHUDDLT and Co., Funeral Feathermen, beg to inform the trade that they have REMOVED their FEATHER BUSINESS from Church-street, Soho, to No. 8, Wellbrook-City, near the Mansion House, where all orders will in future be received, and punctually attended to in town or country.
